1 Application:

- Modernization New system

Description of application:

2 Number of items:

.....

3 Date when required / delivery date:

.....

4 Length of cable run (for protection hose):

.....

5 Outside Ø of cable:

.....

6 Connection thread on encoder side:

- M20 (standard) M25 (with adapter)

7 Encoder type (if known):

.....

8 Degree of protection:

- IP40 IP54 IP66/IP67 IP68/IP69 Other:

9 Temperature range (ambient):

.....

10 Brief peak temperatures:

- No
- Yes, °C, lasting minutes

11 Special fields of applications / requirements:

(please select only the most important properties)

- Environment (UV / ozone) / application in outdoor areas (e.g., crane technology, mining)
- Extremely saliferous air, humidity, UV / ozone (e.g., offshore sectors, crane technology)
- Aggressive liquids (e.g., acids / alkalis used in steel refining, chemical plants)
- Mechanical impact loads (e.g., rolling mills, mines)
- High temperatures (e.g., steel making, hot rolling mills)
- High abrasion (e.g., resistant to casting powder and similar)
- High flexibility (e.g., devices subject to heavy workloads such as robots and similar)

Further properties / requirements:

(e.g., material restrictions [silicone-free, etc.], special requirements, other descriptions)
